

GENERAL CATALOGUE 2026

OUR PRODUCTION FACILITIES

INJECTION MOLDING MACHINES

Now, We have 15 injection molding machines in our facility.

Our extensive knowledge of polymers, colorants, additives and processing parameters and our considerable experience in a wide variety of injection moulding materials enable us to select the most suitable components for any project.

Plastic Materials

Our materials are selected based on heat, pressure, strength, cost and other properties. We can manufacture with ABS (Acro nitrile - Butadiene - Styrene), PC (Polycarbonate), PE (Polyethylene), PP (Polypropylene), Polyamide (PA6-PA66-PA12), Peek, PPC, GF30, GF50, PBT (PolyButyleneTeraflate), TPE (Thermoplastic Elastomer), POM (Polyoxymethylene), PS (Polystyrene) and other special compounds

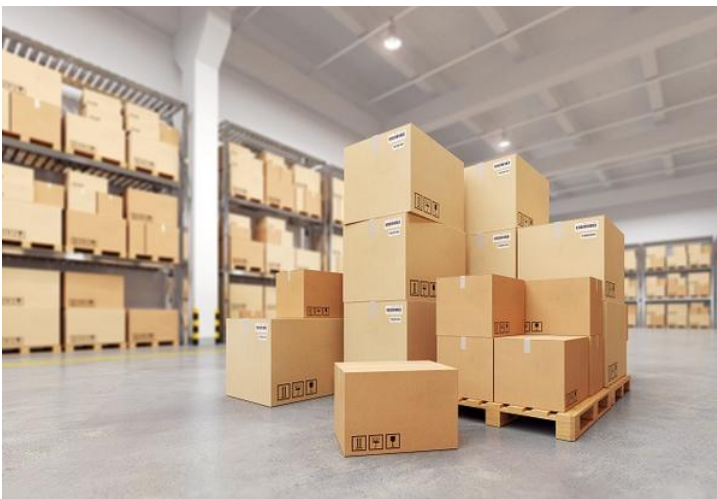

MOP PRODUCTION

While we manufacture a variety of mops (dust mops, wet mops, deck mops, etc.), we also sell other commercial floor cleaning tools such as brooms, handles, scrub brushes, janitor carts, etc. Visit our product section for more details.

Our commercial cleaning products come with a customer satisfaction guarantee. Our raw materials and finished products are sourced through vendors that meet our high quality standards. Our internal quality control process guarantees that no product is sold without our utmost confidence in its performance.

WAREHOUSE AND LOGISTIC

We have an area of 400 sqm for storage our products and finished orders of our reliable customers.

Our focus is to provide our clients with the feeling of a proprietary facility while providing cost-effective solutions. We understand that our clients' needs vary; which is why we take the time to understand your unique situation. Our dedicated warehousing team works hard to create a seamless extension in managing our clients' inventory needs. With our warehouse technology, we are.... always watching your inventory.

OUR CERTIFICATES

ISO 9001 : 2015

What are the Benefits of ISO 9001:2,15 System?

Strengthening the establishment's image,
 Customer satisfaction,
 Increase in the number of customers,
 Increase in competitive power,
 Better supplier relations,
 Increase in efficiency of management,
 Positive cultural change,
 Development of quality consciousness,
 Better documentation,
 Becoming systematic,
 Standardization and consistency,
 Increase in efficacy and productivity,
 Reduction of costs.

What will be the benefits of using ISO 45001?

An ISO 45001-based OH&S management system will enable an organization to improve OH&S performance by:
 Implementing OH&S policy and OH&S objectives
 Establishing systematic processes that take into account its "context", its risks and opportunities, its legal and other requirements
 Identification of hazards and OHS risks associated with their activities; controlling to eliminate them or minimize their potential impact
 Establish operational controls to manage OHS risks, legal and other requirements
 Increased awareness of OHS risks
 Evaluating OHS performance and trying to increase its performance by taking appropriate measures.
 Enabling workers to take an active role in OHS issues

What are the Benefits of ISO 14001 Environmental Management System?

Compliance with national or international legal situations is ensured.
 It makes it easier to obtain license based on environmental activities.
 It helps to gain prestige in the international arena.
 It reduces the costs of solving existing problems in the environment.
 It ensures a more effective and efficient use of natural resources.
 It reduces adverse events.
 It supervises and helps to reduce the negative effects of production activities within the company on the environment.
 By increasing the quality of the workplace, it enables workers to work in more ideal conditions.
 Develops environmental awareness after the training given to the employees

What will be the benefits of using ISO 22000:2018?

It provides global recognition of your commitment to safety in food, beverage, ingredient and pet food supply chains and helps you to:

- Control and reduce food safety hazards.
- Demonstrate a commitment to food safety.
- Sell your products through the food supply chain more easily.
- Gain competitive advantage.

RETRO MOP HOLDER

Flat mopping system with pockets, to be used either pre-soaked, soaked on demand with soaking station or with handles with tank. Ideal for professional and high performance cleaning of horizontal and vertical surfaces.
